

## Thunderbird 3

1. Open Thunderbird.
2. Click the **Tools** menu, and select **Account Settings...**
3. Click Server setting in the left-hand pane.

4. In the **Server Name** field enter **pop.gmail.com**
5. In the **Port** field enter **995**.
6. Under **Security Settings** click the **Connection security** dropdown and select **SSL/TLS**.
7. Uncheck **Leave message on server**.

8. Click **Outgoing Server (SMTP)** in the left-hand pane.
9. Select your account and click **Edit...**
10. Enter **smtp.gmail.com** in the **Server Name** field.
11. Enter **587** in the **Port** field.
12. Under **Security and Authentication** put a check mark in **Use name and password**.
13. Click the **Connection security** dropdown and select **SSL/TLS**.

14. Click **OK** on the SMTP Server box.
15. Click **OK** on the Account Settings box.
